**Singapore, 19 February 2021** – Singapore Technologies Engineering Ltd (ST Engineering) today reported its full-year financial results for the year ended 31 December 2020 (FY2020).

Group revenue came in 9% lower at \$7.2b, compared to \$7.9b a year ago in the same period, which is in line with the revenue guidance provided in its 3Q market update. Profit before tax (PBT) dropped 23% year-on-year (y-o-y) to \$534.4m from \$695.2m, and its Profit attributable to shareholders (Net Profit) was \$521.8m, down 10% y-o-y from \$577.9m.

### **Group Revenue**

The revenue decline was primarily due to the impact of COVID-19 on the Group, namely *reduction in customer demand, supply chain challenges, and workforce disruption*. Its Aerospace sector was impacted the most due to a weak aviation sector as passenger air travel was curtailed.

### **Group's Profitability**

The Group PBT was impacted negatively by impairment of intangible assets and fair value changes of associates in line with the poorer business outlook for some lines of business due to COVID-19. Further, its U.S. shipbuilding business registered losses in the execution of several projects that were contracted and priced at the trough of the marine industry. The PBT drop was also impacted by lower Group revenue, buffered by savings from productivity and cost reduction initiatives, and government support.

The Group Net Profit similarly saw a reduction, but alleviated by the non-taxability of the Singapore government Job Support Scheme.

### **Cost Reduction Initiatives and Government Support Schemes**

The Group implemented a series of productivity and cost reduction initiatives in 2020, including right-sizing staff strength, salary cuts as well as reduction of outsourced and contract manpower and over-time costs. The Group also reduced discretionary capital expenditures and tightened operating expenditures. The savings from these actions, coupled with the receipt of government support grants enabled the Group to maintain even-keel bottom line in a challenging year.

**Business Sector: Revenue and Profits**

- Aerospace: Revenue was 21% lower y-o-y at \$2.7b from \$3.5b, and its Net Profit was 28% lower y-o-y at \$192.9m from \$268.9m. The results were mainly due to lower volume of MRO activities, asset impairments, and absence of favourable impact of end-of-programme reviews, offset by savings from cost reduction measures and government support. Excluding government support, FY2020 Net Profit for Aerospace would still have been positive.
- Electronics: Revenue was 2% lower y-o-y at \$2.3b, mainly due to rescheduling of projects which were affected by COVID-19. Its Net Profit grew 11% y-o-y to \$203.9m from \$183.3m, largely helped by savings from cost reduction measures and government support.
- Land Systems: Revenue was \$1.4b, comparable to the year before partially due to lower specialty vehicles sales, offset by stronger defence sales. Its Net Profit was 31% higher at \$101.4m from \$77.3m helped by savings from cost reduction measures and government support, partially offset by asset impairments.
- Marine: Revenue was up 10% y-o-y at \$710m from \$647m mainly due to higher contribution from U.S. Shipbuilding, offset by lower revenue contribution from Singapore as yard activities were disrupted by COVID-19. Its Net Profit was down 45% y-o-y to \$28.3m from \$51.5m largely due to weaker U.S. shipbuilding performance, and higher operating costs incurred due to COVID-19 disruption on operations and workforce. Its U.S. operations continued to incur losses in the construction of some vessels that were contracted and priced low at the trough of the marine industry in 2018.

*“Our 2020 financial results were in line with our guidance provided during our 3Q market update. In a year when COVID-19 posed challenges for many industries, we had been able to keep balanced keel because of the underlying strengths of the Group and various mitigating factors including our cost reduction initiatives and government support. Our results underscore the resilience of our businesses and the dedication of our people. We would also like to express our appreciation to our customers and partners for their continued support.*”

*Going into 2021, we expect recovery to be uneven across the industries we participate in. The aviation industry remains subdued and is unlikely to recover to pre-pandemic levels in 2021. Nevertheless, we are focusing on delivering our order book, seizing new opportunities in areas*

*like freighter conversions and cybersecurity. With partial revenue recovery, when combined with savings from our cost reduction initiatives, we target to offset the effects of lower government support in 2021.*

*With our new organisation structure, we are well positioned to better serve our customers, respond nimbly to macro-economic changes and achieve long-term sustainable growth.”*

**Vincent Chong, Group President & CEO**

Commercial sales and defence sales accounted for \$4.6b and \$2.6b respectively of Group revenue. As at 31 December 2020, the Group held \$729m in cash and cash equivalents compared to \$452m at the end of 2019.

### **2H2020 versus 2H2019**

For its second half financial results ended 31 December 2020 (2H2020), the Group posted revenue of \$3.6b, down 18% from \$4.4b a year ago. PBT was 32% lower at \$248.0m from \$365.6m the year before and Net Profit was down 14% at \$264.4m from \$308.6m.

Revenue for the Aerospace sector was 38% lower y-o-y at \$1.2b from \$2.0b and its Net Profit was 38% lower at \$87.9m from \$141.9m a year ago. Revenue for the Electronics sector was 2% lower at \$1.2b and its Net Profit was 14% higher at \$116.3m from \$101.7m the year before. The Land Systems sector posted revenue of \$767m, up 2% from \$755m and its Net Profit was 43% higher y-o-y at \$59.6m from \$41.7m. Revenue for the Marine sector was down 9% at \$325m and its Net Profit was 73% lower at \$6.9m from \$25.2m a year ago.

### **New Contract Wins and Order Book**

The Group's Aerospace and Electronics sectors announced new contracts of about \$5.7b in FY2020, of which over \$1.3b was secured in the last quarter of 2020. In that quarter, the Aerospace sector clinched about \$821m worth of contracts for a spectrum of its aviation manufacturing and MRO businesses, including passenger-to-freighter (P2F) conversion orders for A330P2F units from freight operators and lessors, a five-year airframe heavy maintenance contract to support an international air cargo carrier's multiple fleet types and a four-year airframe heavy maintenance contract to support a North American airline's Boeing 777 fleet.

In 4Q2020, the Electronics sector won about \$516m worth of contracts from global customers for products and solutions in smart mobility, Internet of Things (IoT), defence, public safety and security. These include contracts to deploy an Enterprise Asset Management System for the Singapore MRT North-East Line, and Passenger Information Systems for the Singapore MRT Circle Line and North-East Line. Its IoT business also extended its streetlight control solution to cities in New Zealand, the U.S. and Sweden, and its Water Advanced Metering Infrastructure solution to help cities in the U.S. and around the world optimise water consumption and operational efficiency. Various contracts were also secured for the sector's defence and public safety and security businesses, including the deployment of its first Perimeter Intrusion Detection System for a global pharmaceutical facility based in Singapore, a port surveillance and tracking system, and a digital platform with integrated AI capabilities for a healthcare institution.

These new contracts, together with other contracts won but not disclosed, and after adjustments of revenue delivery and project cancellations of about \$1b, bring the Group's order book to \$15.4b as at 31 December 2020. This is slightly higher than the order book at year-end 2019, despite the challenges brought about by COVID-19. The Group expects to deliver about \$5.3b from the order book in 2021.

### **Dividend Payout and Dividend Yield**

The Board of Directors proposes a Final Dividend of 10.0 cents per share. Together with the Interim Dividend of 5.0 cents per share distributed in September 2020, shareholders will receive a total dividend of 15.0 cents per share for FY2020. This translates to a dividend yield of 4%, computed using the average closing share price of the last trading day of 2020 and 2019.

**1(a) BREAKDOWN AND EXPLANATORY NOTES TO CONSOLIDATED INCOME STATEMENT**

	<b>GROUP</b>		
	<b>FY2020</b>	<b>FY2019</b>	<b>+ / (-)</b>
	\$'000	\$'000	%
1.1 Profit from operations is arrived at after charging the following:			
Depreciation and amortisation	378,631	368,252	2.8
The higher depreciation and amortisation in FY2020 was largely attributable to higher depreciation of right-of-use assets, partially offset by lower amortisation of capitalised development costs.			
Impairment loss on trade receivables and contract assets	26,686	53,473	(50.1)
The lower impairment loss in FY2020 was due mainly to lower impairment of trade receivables and contract assets in Aerospace and Land Systems sectors, partially offset by higher impairment in Electronics sector.			
Allowance for inventory obsolescence, net	40,001	76,780	(47.9)
The lower allowance for inventory obsolescence in FY2020 was largely attributable to Aerospace sector, partially offset by higher allowance from Electronics and Land Systems sectors.			
1.2 Finance costs, net comprises:			
Interest income	5,743	9,487	(39.5)
Exchange (loss)/gain, net	(19,441)	3,350	NM
Fair value changes of financial instruments/hedged items	1,333	(2,731)	NM
Interest expenses	(49,583)	(44,753)	10.8
	<u>(61,948)</u>	<u>(34,647)</u>	78.8
The higher finance cost in FY2020 was due mainly to unfavourable exchange rate movements, higher interest expense incurred on acquisition of MRA Systems, LLC (MRAS) and iDirect Europe and lower interest income.			
1.3 Profit after taxation as a percentage of revenue	7.3%	7.5%	
1.4 Profit attributable to shareholders as a percentage of share capital and reserves at end of the year	22.8%	26.0%	
1.5 The Group's tax charge in FY2020 included adjustments for overprovision of current tax of \$24.1 million and underprovision of deferred tax of \$14.5 million in respect of prior years. (FY2019: Adjustments for overprovision of current tax and deferred tax of \$9.2 million and \$12.3 million respectively.)			
1.6 The lower distribution and selling expenses in FY2020 (by \$38.5 million) was due mainly to lower travelling expenses and impairment of trade receivables.			
1.7 The higher other operating expenses (by \$17.4 million) arose mainly from goodwill impairment taken for cash generating units in Aerospace and Land Systems sectors.			
1.8 The lower other income, net (by \$12.7 million) was mainly attributable to lower gain from sale of property, plant and equipment in FY2020 and unfavourable fair value change of associates in the Corporate Venture Funds.			
1.9 The share of lower profits from associates and joint ventures (by \$8.6 million) was mainly attributable to lower contribution from associates and joint ventures in Aerospace, Electronics and Land Systems sectors, partially offset by contribution from Experia Events Pte Ltd.			
1.10 The lower taxation expense (by \$93.8 million) was due largely to non-taxable Jobs Support Scheme grants received from the Singapore government, tax adjustments and lower profit before tax.			
1.11 COVID-19 related government support of about \$350 million before tax were recognised during the year, including amounts received under the Jobs Support Scheme and various government grants received by the Group's subsidiaries in the countries they operate in.

**2(a) ANALYSIS OF BALANCE SHEETS**

Compared to 31 December 2019, the Group's liquidity position has improved, largely from the decrease in current liabilities on the back of repayment of commercial papers and bank loans with proceeds received from the issuance of its 5-year US\$750 million, 1.5% Medium Term Notes (MTN) on 29 April 2020 and advances received for long-term contracts from its customers.

**3(a) ANALYSIS OF CONSOLIDATED STATEMENT OF CASH FLOWS (cont'd)**

The Group ended the year with cash and cash equivalents of \$729 million, \$277 million higher than FY2019. The Group generated net cash of \$1,533 million from operating activities in FY2020, as compared to \$590 million in FY2019. The increase is largely due to favourable working capital movements from contract liabilities due mainly to advances received from customers as well as lower trade receivables and contract asset balances.

Net cash used in investing activities of \$295 million was mainly attributable to the Group's investment in property, plant and equipment by Aerospace (\$92 million), Electronics (\$35 million), Land Systems (\$24 million), Marine (\$30 million) sectors and Others (\$19 million), additions to other intangible assets (\$87 million), and loan to associates and joint ventures (\$19 million).

Net cash used in financing activities of \$959 million in FY2020 was mainly attributable to net repayment of commercial papers (\$1,046 million), bank loans (\$373 million), the payment of FY2019 final dividend and FY2020 interim dividend (\$468 million), repayment of lease liabilities (\$61 million) and interest paid (\$58 million), partially offset by proceeds from issuance of MTN (\$1,058 million).

<b>Total</b>	<b>7,158</b>	<b>7,868</b>	<b>(710)</b>	<b>(9%)</b>

The Group ended the year with revenue of \$7,158 million, a decrease of 9% or \$710 million as compared to FY2019. All sectors, except for Marine sector and “Others”, contributed to the decrease.

In FY2020, Aerospace sector was impacted by reduced activities arising from COVID-19 and reported a decline in revenue of \$737 million or 21%, to \$2,713 million. The decrease was attributable to all three business groups.

Compared to FY2019, Electronics sector’s revenue of \$2,287 million decreased by 2% or \$50 million, contributed by all three business groups, due mainly to rescheduling of projects affected by COVID-19.

Revenue for Land Systems sector in FY2020 declined slightly by 1% or \$17 million to \$1,411 million. **Automotive** business group had lower US specialty vehicles sales, impacted by COVID-19, partially offset by increased vehicle production in Singapore.

Revenue of Marine sector in FY2020 of \$710 million was 10% or \$63 million higher as compared to FY2019. The increase was due mainly to higher contribution from US Shipbuilding partially offset by lower revenue from Singapore operations as yard activities were disrupted by COVID-19.

Higher revenue under “Others” was attributable to ST Engineering Innosparks Pte. Ltd.

Note: With effect from 1 January 2020, Miltope Corporation was re-organised from Others into Electronics sector and all comparatives were restated in conformance with current year classification.

**10 REVIEW OF GROUP PERFORMANCE** (cont'd)

**10(b) Profit attributable to shareholders**
FY2020 vs FY2019

\$m	<b>FY2020</b>	<b>FY2019</b>	<b>Increase/(Decrease)</b>	
Aerospace	192.9	268.9	(76.0)	(28%)
Electronics	203.9	183.3	20.6	11%
Land Systems	101.4	77.3	24.1	31%
Marine	28.3	51.5	(23.2)	(45%)
Others	(4.7)	(3.1)	(1.6)	NM
<b>Total</b>	<b>521.8</b>	<b>577.9</b>	<b>(56.1)</b>	<b>(10%)</b>

The Group's profit attributable to shareholders (Net Profit) for FY2020 of \$521.8 million was lower than that of FY2019 by 10% or \$56.1 million. The decrease was contributed mainly by Aerospace and Marine sectors, partially offset by Electronics and Land Systems sectors.

Aerospace sector's Net Profit in FY2020 of \$192.9 million declined by 28% or \$76.0 million as compared to FY2019, due mainly to lower activities, impairment of assets, absence of net favourable impact from end-of-programme reviews and share of lower profits from associates and joint ventures, partially offset by government support and cost reduction measures.

In FY2020, Electronics sector's Net Profit of \$203.9 million increased by 11% or \$20.6 million as compared to FY2019. The increase was largely due to government support and cost reduction measures, partially offset by impact of lower revenue, unfavourable sales mix and share of higher losses from associates and joint ventures.

In FY2020, Land Systems sector achieved Net Profit of \$101.4 million, 31% or \$24.1 million higher than FY2019, due mainly to higher revenue from vehicle production, government support and cost reduction measures, partially offset by weaker performance from US specialty vehicles, unfavourable product mix, impairment of assets and weaker performance from associates.

Marine sector's FY2020 Net Profit decreased by 45% or \$23.2 million to \$28.3 million due mainly to weaker US shipbuilding performance and higher operating costs incurred due to COVID-19 disruption on operations.

## 11 **VARIANCE FROM PROSPECTS STATEMENT**

No variance from the previous prospects statement.

## 12 **PROSPECTS**

### **Group**

The Group's 2020 financial results were in line with our guidance provided during our 3Q market update. In a year when COVID-19 posed challenges for many industries, we had been able to keep balanced keel because of the underlying strengths of the Group and various mitigating factors including our cost reduction initiatives and government support. Our results underscore the resilience of our businesses and the dedication of our people. We would also like to express our appreciation to our customers and partners for their continued support.

Going into 2021, we expect recovery to be uneven across the industries we participate in. The aviation industry remains subdued and is unlikely to recover to pre-pandemic levels in 2021. Nevertheless, we are focusing on delivering our order book, seizing new opportunities in areas like freighter conversions and cybersecurity. With partial revenue recovery, when combined with savings from our cost reduction initiatives, we target to offset the effects of lower government support in 2021.

With our new organisation structure, we are well positioned to better serve our customers, respond nimbly to macro-economic changes and achieve long-term sustainable growth.

This release may contain forward-looking statements that involve risks and uncertainties. These forward-looking statements reflect the Company's current intentions, plans, expectations, assumptions and beliefs about future events. Actual future performance, outcomes and results may differ materially from those expressed in forward-looking statements as a result of a number of risks, uncertainties and assumptions. Representative examples of these factors include (without limitation) general industry and economic conditions, interest rate trends, cost of capital and capital availability, competition from other companies and venues for the sale/distribution of goods and services, shifts in customer demands, customers and partners, changes in operating expenses, including employee wages, benefits and training, and governmental and public policy changes, as well as natural disasters which may negatively impact business activities of the ST Engineering group. You are cautioned not to place undue reliance on these forward-looking statements, which are based on current view of management on future events.

## 13 **DIVIDENDS**

The Directors are pleased to announce that a final dividend of 10.0 cents per share has been recommended for the year ended 31 December 2020. Together with the interim dividend of 5.0 cents per share paid on 2 September 2020, the total dividend for the year ended 31 December 2020 will be 15.0 cents per share and amounts to \$468 million. The recommended dividends take into consideration the Group's FY2020 profit after tax, present cash position, positive cash flow generated from operations and projected capital requirements. Payment of the final dividend is subject to the approval of the shareholders of the Company at the forthcoming Annual General Meeting.
